Question Number	**Option 1:** competition pricing **Option 2:** cost plus pricing Justify which **one** of these two options *AWG* should choose. **Indicative content**	Mark
3 (e)	**AO2 = 3 marks AO3 = 3 marks** **AO4 = 3 marks** **AO2** • **Option 1** – Competition pricing would see *AWG* selling clothing at similar prices to other clothing retailers • **Option 2** – Cost plus pricing would mean *AWG* would calculate the costs of making the jumpers and then add a markup for profit **AO3** • **Option 1** – This may increase the chance of selling the clothes as younger customers are likely to compare the prices of clothing especially if their income is low • **Option 2** – *AWG* can guarantee that they would make a profit on each item sold **AO4** • **Option 1** – However, as *AWG* use sustainable materials in its jumpers, the manufacturing cost of the clothing may be high, which means selling at a competitive price may not be feasible • **Option 2** – However, cost plus pricing does not account for what the customer is willing to pay, and *AWG* could be losing out on possible increased revenue/profits	**(9)**
